

1. Ground Water Recharging

Objectives: The aims of the ground water recharging in the campus is to abate the progressive depletion of ground water in Kendrapara district and also to combat unfavourable salt balance and saline water intrusion of ground water.

Context: Groundwater recharge can be defined as water added to the aquifer through the unsaturated zone after infiltration and percolation following any storm rainfall event. As the college is situated in the costal part of the Bay of Bengal, it has been suffering from the problems of excessive salt balance in the water and intrusion of saline water.

Practices: The college has a pond inside its campus used for ground water recharging. And also the pond is used for watering the gardens of the college.

Evidence of Success: The college has been sincerely sensitizing the students and the staff members of the college regarding the depletion of the ground water and there to rational use of the water. Beautification of the college garden is possible with this practice of recharging ground water.

Problems: Funds may be raised for maintaining the pond for future uses. Provisions should be made to use the water for the drinking purpose

2. Regular organization of Seminars, Conferences, and Extramural Talks

To educate students for career success is the mission statement of an Educational Institution. Academic skills encourage students to become more efficient learners. Exams have an important role in the process of learning and in the whole educational institution. To develop the learning ability of the students different types of exams are being conducted by the colleges. Exams help every teacher to understand the mental capacity of the students and to rectify their shortcomings.

Tulasi Women's College, Kendrapara has a vibrant and spacious campus and is well connected to the students. The college provides meaningful, value-based education to students. A tree is nothing without its roots similarly, education without exams. So the understanding capacity of students can be judged with the help of their conceptual knowledge. There are different types of exams being conducted by Tulasi Women's College for the development of the students learning ability. Except the University exams, pre-mid, post-mid and Midterms are being conducted for the graduation students by the college. Every year some students are scared of the midterm and semesters and even were scared by the results. So pre-mid is very necessary for the students. After the pre-mid the students who secure less marks than other students are taken more care. They are provided remedial classes. So they can feel free to try new kinds of questions. Then mid-terms are conducted near the middle of any given semester. It measures the students' grasp of the course materials and identify areas that need work. After that post-midterm is conducted before the final exam to finally assess how far the learners have progressed in the subjects.

Education plays a pivotal position in the human society. Education is the process to facilitate learning, acquisition of knowledge, developing skills, acquiring values, enhancing beliefs and cultivating good habits; Educational Methods are of different types, of which teaching occupies prime position.

Seminars, workshops and conferences held great importance in the life of a student. They are platforms not only to learn new aspects, others perspectives and latest information, but also a good way of networking. By learning about new topics and by meeting the eminent personalities and leaders in their respective fields, the students feel encouraged and motivated. Listening to the

prominent personality in the seminars or workshop helps the student to gain information about their way of work or how things take place. It helps to know about new discoveries in their field. Tulasi Women's College, Kendrapara has organised number of National Seminars have been organised by all the departments of the college. The college has invited the resource persons from the different Universities all over the country. In these seminars students are provided a chance to interact with experts from the specific field. After discussing about relevant topics of the particular subjects, students tend to learn about the latest information and new skills related to their concerned subject.
